Permit Requirements for The City of Treasure Island

The City of Treasure Island requires a permit for any new building, addition, remodeling, demolition, or work in excess of \$500.00, or which would require an inspection. Single family and 2 family homeowners may act as their own contractor, as long as certain regulations are met (see Homeowner/Contractor Affidavit). Commercial properties, including condominiums, must use a licensed contractor. We have compiled a list of the most common required building permits. ***Please note that not all permit requirements will apply to all properties, nor is every type of permit type listed.*** If you do not find on this list what you are planning or if you have questions, please call **The City of Treasure Island Community Improvement Department at 727-547-4575, ext 230.**

Building Permit

- Construction of a new home, re-model of existing home or dwelling unit, or any re-configuration of existing space, including interior/exterior demolition.
- For all screen rooms, carports, pool enclosure etc.
- Installation of drywall or backer-board for tile.
